

Quality and Environmental Policy

Our mission, as a company that meets our customers' expectations, is to know and fully understand their needs so we can keep them satisfied with top quality products.

To manufacture products (GL-DMC catalyst) that satisfy our customers' expectations, while keeping the environment safe and clean is our main objective.

Our mission is confirmed by the implementation, maintenance and improvement of the Integrated Quality and Environmental Management System in accordance with ISO 9001:2015 and ISO 14001:2015.

Our objectives relating to quality and environmental are incorporated in the Quality and Environmental Management System, and they will be achieved in two stages:

STAGE I (to 31.03.2016):

- continual improvement of the Integrated Quality and Environmental Management System focused on a systemic approach to quality and environmental protection,
- compliance with current legislative requirements and other environmental protection regulations in force in our company,
- permanent monitoring and improving of the GL-DMC production process, in order to comply with our customers' needs and expectations and to reduce the environmental emissions of pollutants,
- improvements in waste management in order to increase the possibility of its further reuse,
- regular education of employees to increase environmental awareness, involving all our employees in the Integrated Quality and Environmental Management System.
- our Quality and Environmental Policy is assigned to all organizational elements and includes their responsibilities and tasks.

STAGE II (to 31.12.2016)

- extension of the Integrated Quality and Environmental Management System to include all processes in this company.
